

Pre-Solicitation Notice Question and Answers: SSNET-VISIT-UAS Requirement

1. I have a question regarding the information provided on the Industry Day slides posted on FedBizOpps -
"N6134013R0059_N6134013R0059_SSNET_Industry_Day_Presentation_for_release.pdf".

The question is regarding the first bullet of the slide on page 36 of this PDF:

"Offeror shall provide past performance information on 3 to 5 relevant contracts from the past 5 years"

Could this past performance requirement be satisfied by both the prime and sub-contractor, or is it a requirement for the prime to be responsible for the complete set of past performance?

Answer: The government will evaluate both the prime and subcontractors for relevant past performance contracts. The amount "3 to 5" is the anticipated maximum amount the government will request to evaluate. The government anticipates to request up to 5 relevant contracts or delivery orders for the prime contractor and up to 3 relevant contracts or delivery orders for subcontractors.
